

## Wilderness Adventurers of Ontario Inc.

### COVID-19 INFECTION ASSESSMENT QUESTIONS

Last Revised: June 10, 2020

WA trip or event organizers are currently required to screen potential participants including themselves by asking the following health questions during the COVID-19 pandemic. These screening questions are based on health authorities in Ontario and are an aid to help individuals determine whether there is a chance that they could be COVID-19 positive. Each participant should be asked these questions at the time of sign-up and again at the start of the trip.

- Have you been out of the country in the last two weeks?
- Have you been exposed to anyone with a positive infectious disease test, or with anyone who is presently self-isolating?
- Are you suffering from any respiratory symptoms? New or worsening cough or shortness of breath?
- Have you been suffering from fever, chills, sore throat or runny nose?
- Do you have any gastro-intestinal symptoms such as nausea, vomiting or diarrhea?

**If the club member and/or potential participant answers 'Yes' to any of these questions, they cannot participate in the event.** Further, the individual should be encouraged to go to the Government of Ontario's COVID-19 Self-Assessment tool and take recommended action:

<https://covid-19.ontario.ca/self-assessment/symptoms>

These self-assessment questions are an aid only and cannot provide a diagnosis. If there are any related medical questions, consult a health care provider or your local public health unit.
